

# SWIM SPA TREATMENT

Always premix swim spa treatment in 4 litres of fresh water. Pour the mixture around the perimeter of the spa. Run all spa jets for five minutes to distribute product evenly. Instructions and dosage rates are based on an average sized swim spa (5000L - 6000L)

- 1** New swim spas & new users: add two bottles of "spa prep" and follow the bottle's label instructions, except that swim spas do not require the garden hose "pre-filter".
- 2** Add 15mL (0.5 oz) of swim spa treatment to water for the initial dose.
- 3** Every two weeks thereafter: add 7.5mL (0.25 oz) of swim spa treatment to spa water. (Reduce or skip dosage if swim spa is not used regularly or not at all during the prior two week period.)
- 4** Install a clear choice filter sleeve on swim spa cartridge filter for best results.
- 5** Rinse spa filters and filter sleeves weekly using clean water and a good spray nozzle. Monthly: remove spa filters and filter sleeves, soak in clean water and five cups of white vinegar overnight. Rinse well and reinstall before using spa.
- 6** Ph: new users and/or new spas, maintain a water ph of 7.6 For the first three months. After three months stop adjusting ph, let the water balance it self. Use any traditional ph up/down product along with test strips for this process.

## FILTER SLEEVE INSTRUCTIONS

- The Filter Sleeve enhances the filtering efficiency of the standard cartridge filter in your spa. It is designed to work with our Natural Swim Spa Water Treatment System.
- DIRECTIONS: Remove the spa cartridge filter from your spa. Wrap the Filter Sleeve around the spa cartridge filter and secure it firmly with the attached fabric ties. Reinstall the unit in your spa.
- The Filter Sleeve is designed to fit most spa cartridge filters. The sleeve is based on area coverage and may or may not cover your entire spa cartridge filter.
- Clean the Filter Sleeve weekly by spraying with high pressure water from your sink or garden hose.
- Monthly: Soak the sleeve in 1 cup of white vinegar for 1 hour, rinse well and then reinstall in spa.
